- ☐ Lint-free rags
- ☐ Smooth painter's tape

CALCULATING COVERAGE

Please be sure to validate your complete coverage area and confirm how many kits you will need before starting your project. Visit **rustoleum.com/transformations** for how-to videos and more.

LINEAR FEET – FOR QUICKLY ESTIMATING COVERAGE

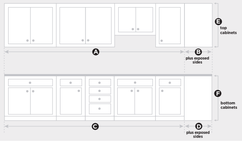
STEP 1: Measure the length of your top and bottom cabinets (A + B + C + D = linear feet). Each kit includes enough coating to cover 40 linear feet of cabinetry with 1-2 coats on each surface. Linear feet based on average height of standard wall and base cabinets being no more than 34-1/2".

SQUARE FEET – FOR CALCULATING EXACT COVERAGE NEEDS

STEP 2: Measure the length of your top cabinets (A + B) in inches and multiply times the height (E). Standard wall cabinet heights are: 12" – 18" and 30" – 42".

STEP 3: Measure the length of your bottom cabinets in inches (C + D) and multiply times the height (F). Standard base cabinet height is 34-1/2".

Add these two totals together and divide by 144 to determine the total square feet you will need to cover. Each kit includes enough coating to cover 100 square feet of cabinetry on each surface.



SATISFACTION GUARANTEED: If you are dissatisfied with this product, contact Rust-Oleum Product Support at 800-901-0411 for product replacement or a full refund of the purchase price. Refer to product number and batch code.
