HONED, TEXTURED, UNPOLISHEDSTON E

Honed, Flamed, Tumbled, Cleft, Split Faced, Sandblasted & Bush Hammered stone.

CAREINSTRUCTIONS

These types of surface finishes look beautiful and are very durable when protected and maintained properly. Textured, unpolished stone is typically more porous than one that is smooth and polished. Due to the increased porosity and more abrasive finish, these surfaces can be very difficult to protect and maintain. In the past, these challenges have been met with difficulty, exhaustion and great expense. **Miracle Sealants Company** offers the most advanced system for the protection, maintenance and restoration of these other natural stone, tile, grout and masonry surfaces. **Miracle Sealants'** products and procedures, combined with three generations of industry knowledge, will aid you in maintaining the timeless beauty of these surfaces.

POINTSOFINTEREST

Foot traffic will wear away the factory finish through abrasion. The floor will slowly develop the natural "patina" through normal use.

Acids in fruit juices, coffee, wine, vinegar and many household chemicals will etch, dull and change the surface of even honed marble.

• For the best bacteria resistance use **511 Impregnator**.

- [•] For the best possible oil and water repellency while offering a darkening/coloren hanced appearance, **511Seal & Enhance** should be used.
- For the best oil and stain repellency use **511 Porous Plus**.
- In any situation where no odor can be present, use **511 H2O+** for stone grout protection.

NEW INSTALLATIONS N

Follow the recommended installation methods and procedures of the Marble Institute of America, Building Stone Institute and Tile Council of America. Allow new installations of setting materials and grout to cure per manufacturer's specification prior to impregnating.

SAMPLETESTING

Due to the differences of each surface, several inconspicuous test patches should be completed with each product to assure maximum performance. **USERS MUST DETERMINE THE SUITABILITY OF THE PRODUCT FOR THEIR INTENDED USE!**

SEALINGASAGROUTRELEASE

Although these types of surfaces vary in their porosity, they all can absorb stains from items including the dye in many grouts. To insure the best possible installation, the appropriate **511 Sealant** should be applied as a grout release before the grouting process. Using a **511 Sealant** will resist dye absorption, facilitate grout residue removal (up to 45% faster), and offer superior stain resistance during the installation process.

DIRECTIONS

Always test a small area to insure desired results. Do not dilute or thin at any time. Shake well.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. **511** may be applied to damp surfaces 1 2 hours after standing water has been removed.
- 3. Apply an even application of **511** using a clean white towel or **MiraBrush Applicator & Tray.**
- 4. Saturate the surface getting the surface "Wet to the Eye" being careful not to allow **511** into the open ungrouted joints.
- 5. Allow **511** to dwell for 3 5 minutes.
- 6. Wipe or buff off any excess **511** before it dries on the surface with dry terry cloth towels.
- 7. Any excess **511** that has dried on the surface creating a residue/film, may be removed by reactivating the residue with **511** and immediately buffing dry with dry terry cloth towels.
- 8. If the residue has been on the surface for more than a few hours, use **Miracle Sealants' Residue Remover**. Apply directly to the surface and immediately buff or wipe dry with dry terry cloth towels.
- 9. For **511 H2O+**, use warm water and a soft scrub pad to remove excess.
- 10. Allow **511** to cure 6–12 hours before proceeding with the grouting process.

- 11. Grout the surface per manufacturer's specifications.
- 12. Clean all grout residue completely with a clean sponge and water.
- 13. Refer to the Product Data Sheet, SDS (Safety Data Sheet) & Label for complete instructions.

With some difficult surfaces it may be necessary to use **Miracle Sealants' Heavy Duty Acidic Cleaner**, **Phosphoric Acid Cleaner**, **Miracle HD Cleaner**, **Epoxy Grout Film Remover** or **Finish Sealer Stripper** (depending on the type of grout) to completely remove all grout residue.

GROUTSEALING

Although grout can be treated with **511 Impregnator**/**511 Porous Plus** / **511 H2O** + within an hour of grout residue removal, it is suggested to allow grout to cure per manufacturer's specification so as not to void any manufacturer warranty on the grout. For existing grout it is not necessary to wait.

- 1. Apply the appropriate **511 Sealant** with a paint brush or **MiraBrush Applicator & Tray** to grout joints.
- 2. Allow **511** to dwell 3 5 minutes.
- 3. Wipe or buff off any excess before it dries on the surface with terry cloth towels.
- 4. Any excess that has dried on the surface creating a residue/film, may be removed by reactivating the residue with **511** and immediately buffing dry with terry cloth towels.
- 5. For **511 H2O+**, use warm water and a soft scrub pad to remove excess.
- 6. Finished area can be used for normal foot traffic in 3 5 hours.
- 7. Allow **511** to cure 72 hours before subjecting to water, oil and staining materials.
- 8. Refer to the Product Data Sheet, SDS & Label for complete directions.

SEALINGANDTHENATURALLOOK

If you are trying to retain the natural look of the stone, we recommend stopping at this point and putting the area into service. This type of finish will require the least amount of maintenance and is recommend for high traffic and food areas for maximum stain and slip protection.

η ΜΑΙΝΤΕΝΑΝCΕ**η**

Although this type of surface will not show wear as readily as other surfaces, it is wise to keep it as clean as possible. Daily sweeping and use of a dust mop will help retain the natural look.

LIGHTCLEANINGFORTHENATURALLOOK

Daily cleaning should consist of using **Limestone/Travertine Soap**. **Limestone/Travertine Soap** can also be used as an alternative for ongoing maintenance when more "patina" is desired on the stone. **Limestone/Travertine Soap** will clean and protect in one step while adding a slight patina to the finish. Apply **Limestone/Travertine Soap** as often as you like as it will hide imperfections, scratches and not build-up on the stone surface. **Limestone/Travertine Soap** can also be used on walls and counters.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix one part **Limestone/Travertine Soap** to ten parts warm water for first 6 months. After 6 months mix one part **Limestone/Travertine Soap** to twenty parts warm water.
- 3. Apply Limestone/Travertine Soap solution using a mop or sponge.
- 4. Do not rinse.
- 5. Allow Limestone/Travertine Soap solution to dry.
- 6. Change the water when it becomes dirty or cloudy.
- 7. Finished area can be used for normal foot traffic in 1 5 hours.
- 8. Refer to the Product Data Sheet, SDS & Label for complete directions.

In kitchen and food preparation areas use **Miracle Sealants' Tile & Stone Cleaner**. Can go back to using **Limestone/Travertine Soap** after cleaning with **Tile & Stone Cleaner**.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix one part **Tile & Stone Cleaner** with ten parts warm water (1:10). For more difficult cleaning issues, use a mixture of one part **Tile & Stone Cleaner** with three parts warm water (1:3).
- 3. Apply **Tile & Stone Cleaner** solution using a mop or sponge.
- 4. Allow solution to dwell 10-20 minutes.
- 5. Agitate periodically with a medium brush.

- 6. Extract all dirty remains with towels or a wet vacuum.
- 7. Rinse the surface with clean water to eliminate any streaks or residue.
- 8. Change the water when it becomes dirty or cloudy.
- 9. Finished area can be used for normal foot traffic in 1 5 hours.
- 10. Refer to the Product Data Sheet, SDS & Label for complete directions.

COLORENHANCEMENT

Always test a small area to insure desired results. Do not dilute or thin at any time. Shake well.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

For color enhancement we recommend **Miracle Sealants' 511 Seal & Enhance** natural stone impregnator and color enhancer. **511 Seal & Enhance** was designed to enhance the natural color and texture of all flamed, tumbled, sandblasted and textured natural & cast stone surfaces. In addition to beautifying the stone, **511 Seal & Enhance** offers stain resistance to water, oil and stains all in one product.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Apply using a clean white towel or **MiraBrush Applicator & Tray.**
- 3. Apply enough to the surface so it is "Wet to the Eye"
- 4. Do not allow **511 Seal & Enhance** to puddle or air dry on the surface.
- 5. Work in small areas.
- 6. At least two applications are necessary to achieve desired enhancement, water, oil and stain resistance.
- 7. Apply second application after the initial application has dried at least one hour.
- 8. Remove excess before it dries with dry terry cloth towels.
- 9. Excess may be removed by reactivating residue with **511 Seal & Enhance** and immediately buffing dry with dry terry cloth towels.
- 10. Finished area can be used for normal foot traffic in 3 5 hours.
- 11. Keep free from water, oil and stains for 72 hours.
- 12. Refer to the Product Data Sheet, SDS & Label for complete directions.

LIGHTCLEAN INGFORCOLORENHANCEMENT

Daily cleaning of stone impregnated with **511 Seal & Enhance** can consist of using **Limestone/Travertine Soap** or **Tile & Stone Cleaner** as directed previously in this guide.

ŊRESTORATIONŊ

FLOORCOATING/WAXREMOVAL

Always test a small area to insure desired results.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

To remove existing water base coatings and waxes use **Miracle Sealants' Finish Sealer Stripper** fast acting stripper. To remove existing solvent base coatings, waxes and mastics use **Miracle HD Cleaner or Epoxy Grout Film Remover** or a solvent base stripper.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Apply stripper to the surface undiluted.
- 3. Allow solution to dwell for 5 20 minutes, agitating periodically with a medium aggressive hand brush for small areas and floor brush and a 175 rpm, 150 lbs. floor machine for large areas.
- 4. Remove all dirty remains with towels or a wet vacuum.
- 5. Thoroughly rinse surface with clean water.
- 6. Allow the surface to dry.
- 7. Multiple applications may be required.
- 8. **Finish Sealer Stripper** is alkaline and may affect the surface finish of some stone.
- 9. Finished area can be used for normal foot traffic in 1 5 hours.
- 10. Refer to the Product Data Sheet, SDS & Label for complete instructions.

HEAVYDUTYCLEANING

Always test a small area to insure desired results.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

To remove hard water deposits, grout residue, efflorescence, rust and other heavy dirt and grime use Liquid Poultice, Miracle HD Cleaner, Phosphoric Acid Cleaner, Heavy Duty Acidic Cleaner or Porcelain & Ceramic Tile Cleaner.

Acid Sensitive Surfaces should be cleaned with **Miracle Sealants' Liquid Poultice**, a non-acidic deep cleaner designed specifically for acid sensitive stone surfaces. Use of **Liquid Poultice** will not affect the natural finish of the stone.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix one part Liquid Poultice Part A with one part Liquid Poultice Part B with 2 equal parts warm water.
- 3. Wet the surface to be cleaned.
- 4. Apply Liquid Poultice solution using a soft brush, towel or mop.
- 5. Allow solution to dwell 40 minutes while keeping the surface damp.
- 6. Agitate the surface with a soft brush periodically.
- 7. Remove excess with towels or wet vacuum.
- 8. Rinse with clean water.
- 9. On walls a fine mist may be applied and allowed to dry up to 72 hours.
- 10. Finished area can be used for normal foot traffic within 1 5 hours.
- 11. Refer to the Product Data Sheet, SDS & Label for complete instructions.

For hard water deposits and soap scum that may begin to develop in shower and bath surfaces use **Miracle Sealants' Porcelain & Ceramic Tile Cleaner**. Easy to use, and very effective **Porcelain & Ceramic Tile Cleaner** contains mild abrasives in a mild ammonia cleaner. Not only does it clean but also it will tend to "even out" the blotchy look of smooth honed stone. Not for use on textured surfaces.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Simply flip the top and squeeze some onto a soft, white scrub pad.
- 3. Scrub in circular motions.
- 4. Rinse with water and damp wipe the dirt away.
- 5. For large area, **Porcelain & Ceramic Tile Cleaner** can be applied directly to the honed surface and buffed using a **Marble Master MM 1000** floor machine.
- 6. Finished area can be used for normal foot traffic in 1 5 hours.
- 7. Refer to the Product Data Sheet, SDS & Label for complete instructions.

For the most aggressive cleaning challenges use **Miracle Sealants' Heavy Duty Acidic Cleaner**, a strong hydrochloric acid cleaner.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix one part **Heavy Duty Acidic Cleaner** with ten parts water (1:10). Do not use stronger than (1:3).
- 3. Wet surface to be cleaned with clean water.
- 4. Apply **Heavy Duty Acidic Cleaner** solution using a brush, towel or mop.
- 5. Allow solution to dwell 1 5 minutes while keeping the surface damp.
- 6. Agitate the surface with a brush.
- 7. Do not allow solution to dry on the surface.
- 8. Remove excess with towels or wet vacuum.
- 9. Rinse with one part **Tile & Stone Cleaner** with ten parts clean water (1:10) to insure complete neutralization.
- 10. Finished area can be used for normal foot traffic in 1 5 hours.
- 11. Refer to the Product Data Sheet, SDS & Label for complete instructions. For a little less aggressive cleaning challenge use **Miracle Sealants' Phosphoric Acid Cleaner**.
- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix one part **Phosphoric Acid Cleaner** with ten parts water (1:10). Do not use stronger than (1:3).
- 3. Wet surface to be cleaned with clean water.

- 4. Apply solution using a brush, towel or mop.
- 5. Allow solution to dwell 1 5 minutes while keeping the surface damp.
- 6. Agitate the surface with a brush.
- 7. Do not allow solution to dry on the surface.
- 8. Remove excess with towels or wet vacuum.
- 9. Rinse with one part **Tile & Stone Cleaner** with ten parts clean water (1:10) to insure complete neutralization.
- 10. Finished area can be used for normal foot traffic in 1 5 hours.
- 11. Refer to the Product Data Sheet, SDS & Label for complete instructions.

STA IN R E MO V A L

For stain removal troubleshooting use **Poultice Plus** and refer to the **Miracle Sealants'** Stain Removal Guide for further information.

Always test a small area to insure desired results.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Mix **Poultice Plus** with the appropriate **MSC Cleaner** (refer to stain removal guide) into a peanut butter like paste.
- 3. Apply **Poultice Plus** paste to stain about 1/4" thick and overlap the stained area by 1/4".
- 4. Cover the **Poultice Plus** paste with plastic wrap.
- 5. Tape the plastic wrap to the surface using non-marking tape to create an "air tight" seal.
- 6. Allow to dry 24 48 hours or until completely dry to hard clay like paste.
- 7. Remove plastic wrap from stain.
- 8. Remove the residual powder/paste away using a wood spoon or spatula.
- 9. Rinse the area using distilled water.
- 10. Multiple applications may be necessary to remove stain entirely.
- 11. Finished area can be used for normal foot traffic in 1 5 hours.
- 12. Refer to the Product Data Sheet, SDS & Label for complete instructions.

COUNTERCLEANING

For counters (especially high honed), using **Miracle Sealants' Counter Kleen** as often as you want, will keep it clean without streaking. **Counter Kleen** is a non-toxic cleaner that is easily sprayed onto the surface and wipe off.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Ready-to-use. Spray directly onto counter.
- 3. Wipe dry using a clean dry towel.
- 4. No rinsing necessary.
- 5. Finished area can be used immediately.
- 6. Refer to the Product Data Sheet, SDS & Label for complete instructions.

RESURFACING/REFINISHING

To restore the luster low gloss, satin, honed finish and deep clean, scrub/buff using **Miracle Sealants' Mira Hone** (nonacid powder) as directed. These products will remove light scratches and imperfections. As well as give a more uniform look to honed materials that typically have a blotchy look to them.

- 1. Sweep or vacuum all dust, dirt and surface debris. Insure the surface is clean, dry and free from contaminants.
- 2. Wet the stone surface with clean water.
- 3. Sprinkle **Mira Hone** onto the surface.

- 4. Buff using a 175 rpm, 150 lbs. floor machine equipped with a natural fiber brush, white nylon pad or polishing pad.
- 5. Buff in a consistent side-to-side movement.
- 6. Create a slurry solution on the surface and keep moist.
- 7. Do not allow slurry to dry on the surface.
- 8. Squeegee slurry to next section as results are achieved.
- 9. Work small areas until desire results are achieved.
- 10. Remove slurry using a wet vacuum.
- 11. Make sure to rinse areas using **Tile & Stone Cleaner** (1:10) in the rinse water.
- 12. Re-treat surface with **511 Sealants** as directed.
- 13. Finished area can be used for normal foot traffic in 1 5 hours.
- 14. Refer to the Product Data Sheet, SDS & Label for complete instructions.

Another option is to apply **Porcelain & Ceramic Tile Cleaner** directly from the bottle. **Porcelain & Ceramic Tile Cleaner** will remove light scratches, imperfections and deep clean smooth, honed surfaces. Use as previously directed in this guide.

For heavy scratches, damage and imperfections, **Diamond Abrasives** should be used by a **stone care professional only**. Heavy restoration is the process of removing the accumulation of scratches and wear by sanding the stone with the appropriate Pyramid Diamond Abrasive pad. This is the same process utilized in many processing plants to achieve the factory finish.

COUNTERCLEANINGANDPROTECTIONREJUVENATION Always test a small area to insure desired results.

Protect neighboring and adjacent surfaces of wood, carpet, metal, landscaping and other surfaces.

For counters, using **Miracle Sealants' 511 Kleen & Reseal**, as needed will keep it clean without streaking while rejuvenating the protection from the appropriate **511 Sealant**. **511 Kleen & Reseal** is easily sprayed onto the surface and wiped off with a clean towel or micro fiber cloth.

- 1. Spray directly onto soiled area.
- 2. Wipe up with a clean, dry towel or sponge. No rinsing necessary.
- 3. Repeat for heavily soiled areas allowing product to sit for several minutes. Agitating or scrubbing with a nylon pad before wiping.
- 4. Finished area can be used immediately.
- 5. Refer to the Product Data Sheet, SDS & Label for complete instructions.

SEALINGMAINTENANCE

Resealing will vary depending on porosity, density, hardness, foot traffic and the elements (indoor or outdoor) the area is exposed to. As a general rule, medium to dense surfaces exposed to heavy foot traffic can be resealed every 1 - 3 years. Very hard surfaces exposed to heavy foot traffic can be resealed every 3 - 5 years. It is important to remember that any additional or future applications of **511 Sealants** will require less sealant than originally used.

SPECIALNOTE

Foot traffic will wear the factory finish through abrasion. Acids in fruit juices, coffee, wine, vinegar and many household cleaners will etch the surface removing the factory finish of all limestone, marble, travertine and other calcareous stone even when treated with an Impregnator/Penetrating Sealer.
